1 OVERVIEW

DB-EVCC-560 is an Electric Vehicle Communication Controller (EVCC) embedded in the EV for rapid charging, compliant with international standards DIN SPEC 70121 and ISO/IEC 15118-2/20, which are core components of the Combined Charging System (CCS) and the Megawatt Charging System (MCS).

For charging communication between the EV and Electric Vehicle Supply Equipment (EVSE), it supports Control Pilot (CP), Proximity Pilot (PP), as well as PWM signaling, including HomePlug Green PHY communication for the CCS system, and 10Base-T1S PHY1/2, Insertion Detection (ID), and Charge Enable (CE) for MCS.

Additionally, charging CAN-BUS control and IEC 61851 compliance are fully integrated, providing maximum flexibility, reliability, and efficiency.
