

Arduino® USB-C Power Supply (65W) – Store page

Short description

A 65 W multi-plug designed for compatibility with multiple countries, delivering stable, regulated power for demanding workloads.

Overview

Unlock the full potential of Arduino® VENTUNO™ Q and other boards in the Arduino ecosystem with stable and regulated power delivery, tested by Arduino itself for maximum reliability – and superior protection of your hardware from power fluctuations.

This **official 65 W multi-plug** is compatible with standard sockets in the EU, UK, US, China, Japan, India and other Asian countries, to keep your projects running around the globe! In addition, the USB-C to DC jack adapter allows you to power up your board from any source you like.

Conformities

The following Declarations of Conformities have been granted for this board:

CE RoHS REACH FCC WEEE UKCA

Arduino and VENTUNO are trademarks or registered trademarks of Arduino S.r.l.
